Applications

The Eco-Harvester is more versatile and effective than traditional aquatic weed harvesters because it can pull, cut, or skim both aquatic weeds and floating debris or algae in shallow water around docks, piers, or marina slips, channels, canals, and retention ponds!

Most important is that it is affordable for lake associations, conservation management, municipalities, and lakeshore maintenance contractors because it is 1/3rd the cost of any other comparable weed harvester/cutter.

If you are interested we would like to invite you for a product demonstration at either our Minneapolis or Milwaukee locations!
